

# Test Resource Management Center (TRMC)

## STEM Internship Program

"The STEM workforce will remain central to our economic vitality well into the future, contributing to innovation, technological growth, and economic development... We cannot win the future without recognizing the growing need for STEM competencies across the economy." -Georgetown University's Center on Education and the Workforce

### What You'll Do

The TRMC Science, Technology, Engineering and Math (STEM) Internship Program during the summer consists of work assignments designed to acclimate you to the fundamentals and concepts of test and evaluation (T&E) within the Department of Defense. While applying your knowledge, you'll broaden your skills and gain valuable experience as you are exposed to test and evaluation in real world settings.

When you participate in the TRMC STEM Internship Program, you'll:

- Gain hands-on engineering experience working on a T&E related project.
- Work directly with other engineers and professionals in a team environment.
- Develop your skills under the guidance of professional and experienced mentors.
- Use our internship program as a gateway to networking and exploring job opportunities within the Department of Defense.
- Obtain a security clearance.

Your assignment may include working a T&E related project at any of the following sites:

- Industry
- DoD Test Site
- Government Headquarters Activity

### Who We Hire

Ideal candidates:

- An interest in a project-based internship learning more about Department of Defense (DoD) testing needs, resources and capabilities.
- Can thrive in a high-performance culture that values teamwork and collaboration.
- Possess strong leadership and communication skills.
- Have sound technical and analytical engineering skills, as demonstrated through strong academic performance.
- Are excited when presented with complex challenges to solve.

To qualify for the intern position you must be:

- A current full-time enrolled college student (sophomores, juniors, seniors or graduate students)
- STEM Background (student is majoring/minoring in a Science, Technology, Engineering, or Mathematics discipline)
- A sole U.S. citizen
- Available June – August 2015

## Aspire to work in an ever-evolving and challenging career in the Department of Defense

### Where You'll Work

The location where local interns will work in the U.S. for summer 2015:

- **White Sands Missile Range (WSMR), NM**
- **Holloman AFB, NM**

### Award Duration and Stipend

Internships are offered during the summer (10-week duration, **June thru August 2015**).

- Interns will receive a competitive salary.
- Interns must be able to work full-time (40 hours per week) during the summer.
- Interns must be able to attain a Secret Clearance

### Application Instructions

Only completed applications will be considered. A complete application includes the following:

- (1) **Completed application form**
- (2) **Resume with cover letter**

**Application Deadline: December 20, 2014**

Submit your resume and application by email to:

[macosta@traxintl.com](mailto:macosta@traxintl.com)  
**TRAX International**  
**(915) 775-0003**

### About Test Resource Management Center (TRMC):

The TRMC oversees the national test and evaluation (T&E) infrastructure for the Department of Defense. The TRMC ensures that the T&E infrastructure can adequately support the development, acquisition, fielding, and sustainment of defense systems.

The TRMC also manages investment portfolios for the development of test technologies and new capabilities for the Department.
