Title: Project Engineer
Location: Albuquerque, NM

Job Summary:
The qualified candidate is responsible for company-wide project control, project estimating, and consulting services to various project managers and management. Accountable to provide quality budgeting, management reporting, forecasting, trending, commitments, and estimates for completion of capital and expense projects. Works closely with the Management team to ensure the objectives of departments are achieved. Provides technical support to all pipeline departments and ensures safe, efficient, and timely execution of projects. Follows all safety rules and guidelines established by Western Refinery Logistics. Participate in safety meetings, public safety programs, and conduct field safety audits. Extensive knowledge of the Federal Pipeline and Hazardous Material Safety Administration procedure, rules and regulations is required

Skill and Knowledge Required:
Bachelors degree in Engineering and at least 8 years of pipeline cost estimating and scheduling experience with detailed knowledge of pipeline specifications and standards or equivalent combination of years of education and experience
Must be able to travel 50% of the time.
Skilled at using a computer with extensive knowledge of Office XP and MS Project and auto cad
Knowledge of design techniques, tools, and principles involved in production of precision technical plans, blueprints, drawings, and models.
Familiar with writing specifications, developing bid drawings and documentation.
Knowledge of arithmetic, algebra, geometry, calculus, statistics, and their applications.
Must have basic understanding of how equipment functions in the field and overall plant operation are required.
Ability to communicate easily with a wide variety of audiences including management as well as external vendors.
Ability to effectively prioritize and plan multiple work activities with varying deadlines and complexities.
Ability to respond to changing business requirements and priorities.
Work effectively in a cross-functional environment with a variety of technical, finance and support groups.
